

KeystoneJS

安装

```
npm install -g yo
npm install -g generator-keystone
yo keystone
```

运行

```
npm start
```

登入后台

```
#用户名
user@keystonejs.com
#密码
admin
```

增加一个实例

```
var keystone = require('keystone');
var Types = keystone.Field.Types;

var Order = new keystone.List('Order');

Order.add({
  name: { type: Types.Text, required: true, index: true },
  date: { type: Types.Date },
  text: { type: Types.Text },
  markdown: { type: Types.Markdown },
  code: { type: Types.Code },
  color: { type: Types.Color },
});

Order.register();
```

源码

```
// keystone/admin/app/createDynamicRouter.js
```
